Rescan Winterville Fire Station One-Stop ballots: During One-Stop, one ballot that had jammed in the DS200 had been refed causing the site to be off by one. In order to have accurate results all ballots from the site needed to be rescanned. To expedite the process the DS850 high speed scanner will be used. After scanning approximately 2,000 ballots, Director Dave Davis recommended to the Board that the bipartisan team be allowed to feed the ballots into four DS200's. The reason for the recommendation was the repeated multi-feed of ballots in the DS850 that was causing ballot counts to be off. Mr. Brown made a motion to allow the bipartisan team to rescan the Winterville Fire Station One-Stop ballots into DS200's. The motion passed unanimously.

The Board adjourned.
